DETAILED ACTION

Response to Amendment

The proposed claim amendments to this CIP Application as discussed with the Applicant's Representative on 12/30/2004 and received on 1/6/2005 has been approved and entered;

New claims 64-78 have been examined on the merits accordingly, originally filed claims 1-63 have been being canceled.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Sarah M. Jabbari on 1/14/05.

The application has been amended as follows:

On line-6 of new independent claim-64; "dye" has been changed to ~~die~~.

Allowable Subject Matter

Claims 64-78 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record all failed to show either alone and/or in combination the process for cultivating *Morchella sclerotia*, specifically the steps of distressing the shoot system of an inoculated tree seedling causing the death of at least a portion of the root system and thus stimulating the formation of *sclerotia* for harvest prior to the formation of ascocarps.

While inoculation of living roots of host plants for the culture of mushrooms (JP 4190714A) is known, and cultivation of *Morchella sclerotia* as "jar inoculum" is known (Ower '809), the method of producing *Morchella sclerotia* whereby the *sclerotia* is harvested from distressed inoculated tree seedling roots is not evident from the patent literature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wood et al. teaches the production of mycorrhizal fungi in association with plant root organ cultures, as background art.
